

Cost Estimating

Arated Building Consulting specializes in construction and engineering cost estimating. Our estimators provide detailed quantity takeoffs and pricing from project conception phase through to closeout.

Arated Consulting maintains databases of historical and current local, national, and international construction and engineering cost figures including labour, material, and equipment costs. We are equipped to prepare estimates and/or verify proposed construction costs at various stages throughout the construction process for projects around the world.

By identifying and analyzing the project's scope, time, cost, quality, and performance, Arated Consulting develops an accurate assessment of how the construction process is unfolding over the course of its duration. Our professional staffs have the estimating experience to provide you with the necessary conceptual project budgets to help get your project off the ground. Our Order of Magnitude budgets are indicative basis to set accurate cost expectations from the beginning of the project, which will help avoid cost disputes in the end.

Whether you are an owner, program manager, contractor, an architect or construction manager; our consultants are equipped to supplement your team's expertise with additional insight to ensure your project's success. Regardless of the stage of your project, Arated Building Consulting cost estimating services can assist with conceptual budgets, preliminary estimates, quantity take-offs, bid estimates or contract pricing.

Our cost experts work with you to prevent waste and maximized return on investment by providing meaningful cost information throughout the design process.
