

Project Controls Training:

Primary focus of this service is to provide avenue for trained professionals and impending professionals who are seeking employment as; project controls specialist, planner scheduler, planning engineer, cost controller, and earned value manager.

Hence, it is suitable for graduates with background in engineering, architecture, geology, and project management. More so for holders of PMP, Prince2 and equivalent designation.

The courses are designed to provide hands-on ability to function (hit-the-ground running) in roles and assignments of chosen profession. These may be in ICI, Civil, Infrastructure, Mining, Oil & Gas and Construction or Production environments.

Training is offered on a corporate, group and individual levels, and are offered in Canada and International locations through the globe.

Courses include:

1. Planning and Scheduling using Primavera P6
2. Cost Management using Hard-Dollar, or Prism or Primavera cost manager

Training may be adapted to suite specific client environment and need. Contact us for information about the next training session and location.
